

ReliaG® Pro Series

MODEL 1028

Belt or Chain Drive
Garage Door Opener

PROFESSIONAL LINE

Highlights

- **Durable Performance** – The DC motor provides quiet, yet strong performance with an opening speed of 6.5" per second* for residential sectional garage doors up to 8' high.
- **Dependability** – The quality built into a Model 1028 is backed by a 5-Year Limited Warranty for the motor and 15-Year for the belt drive rail (5-Year for chain drive rail).[◇]
- **GenieSense™ Monitoring** – Automatic force profiling and diagnostic technology improves safety by stopping operation when significant changes occur
- **Smart Illumination Lighting** – The light bulb is positioned toward the inside of the garage instead of on the door for light where you need it most.

THE GENIE STORY: Genie has a rich history in developing garage door openers that feature reliability, strength, safety, security, and convenience. Since 1954, Genie has produced millions of openers that serve millions of satisfied homeowners every day of every year. Shouldn't you have one in your garage? Genie — The Brand You Trust.

* +/- 0.5 inches per second.

◇ Limited non-transferable warranty. See Programming, Operation & Maintenance Manual for details.

Features & Benefits

POWER & CONTROL

DC Motor Technology – The quiet DC motor offers strength and reliability.

C-Channel Rail – Strong rail design helps promote durability and safety. Also conceals the belt (or chain) for better appearance.

Belt or Chain Drive – Choose the belt drive option for quieter operation or chain drive for economical value.

SAFETY

Safe-T-Beam® Non-Contact Reversing System – When objects pass through the infrared beam, the garage door automatically stops closing and reverses open without having to make physical contact with the door.

SECURITY

Intellicode® Access Security System – Genie’s superior encryption technology prevents piracy of the radio signal that operates your door by always selecting a new code from billions of combinations each time the opener is operated.

CONVENIENCE

Smart Illumination – Light bulb is positioned toward inside of garage instead of toward door for light where it’s needed most. Light stays on for 4 minutes once opener is activated for ample time to get into house. Opener features standard lighting with (1) bulb capability. Genie branded LED light bulb recommended. (If incandescent bulb used, 60 watt max). See Genie LED bulb this page for additional details.

Auto-Seek Dual Frequency – The internal system automatically uses either the 315 or 390 MHz frequency produced by the remote control or keypad to help ensure the opener responds regardless of potential nearby frequency interference, such as military base equipment.

Pre-Programmed Remote – Ready to use out-of-the-box with simple steps to change the programming if so desired.

HomeLink® & Car2U® Compatible – Works with current and ALL previous versions of HomeLink® or Car2U®. No additional external repeater kit or compatibility bridge needed.

6’ Power Cord (Model 1028H) – For high ceiling applications.

Convenience Options

Genie® Garage Door Opener LED Bulb

Common LED and CFL bulbs can emit interference to limit the range of garage door remotes. Incandescent light bulbs, which are being phased out due to energy inefficiency, can have their lives shortened by vibration associated with opener operation. The Genie LED bulb solves these and other problems to ensure the garage door opener light doesn’t leave your garage in the dark!

Aladdin Connect®

Remotely monitor and control your garage door from almost anywhere with your smart device. Time-based features allow you to set door to automatically close and/or notify after a set length of time; as well as schedule a specific hour and minute to close the door and/or notify when it does. Also allows for multiple individual user accounts so you can provide virtual key access for your garage door to a friend, relative, or service person for a certain time, a range of time, or permanently.

Compatible with:

Use the Aladdin Connect app to control any combination of 20 different Genie Wi-Fi integrated garage door openers or standalone Aladdin Connect Door Control Modules.

Wireless Keypad

Easy-to-program keypad mounts outside your door to give you convenient code access to your garage, which is great when you are outside without the remote control. Back-lit keypad lets you easily see the numbers & control up to 3 openers. Uses Auto-Seek Dual Frequency (315/390 MHz). Choose a color for the flip-up cover that best complements your home. White is standard, other colors sold separately.

Wireless Wall Console

An attractive wall console that’s completely wireless for flexible placement in the garage. Enjoy the optional pulsing back-light as well as delay button that gives ample time (up to 30 seconds) to exit the garage before the door begins moving. The work light button can turn just the opener’s light on at any time. Compatible with most Genie Intellicode® openers made since 2013.

YOUR GENIE PROFESSIONAL DEALER:

CALIFORNIA RESIDENTS – This opener is not for sale in California. It does not have a battery backup function as required by California SB-969. Visit www.geniecompany.com for our full lineup of compliant models or ask your Genie dealer for details.
